Fui is collaborative cloud app that enhances travel experience for groups. By making it easier to coordinate, share and build itineraries together.

EXPERIENCE

Software Developer in Test, Microsoft (v-)

Redmond, WA - 2011 - 2019

- Delivered three successful release cycles of Microsoft Lync/Skype for Business
- Drove VSTS Teams integration tasks ownership
- Led test team on bug fixing backlog and prioritization
- Streamline cross-teams' engagement for SDK tests and development by identifying product/SDK versus test issues
- Evangelized bug-bash meetings including previous feature owners providing new team with great knowledge of legacy features
- Trained and managed new hires
- Team leader in number of critical bugs found

Technical Program Manager, FUCAPI

Brazil, AM - 2005 - 2007

- Collected requirements, implemented new features and maintained quality of systems by tracking and fixing bugs
- Built strong and trustworthy relationship with customers. Provided immediate assistance always unblocking stakeholders
- Documented behavior and specs design for legacy systems by reverse engineering
- Drove feature specification while representing client on new project to recreate and integrate systems more reliable and maintainable

Jr Developer, Amazonas Energia

Brazil - 2002 - 2005

- Worked closely with end users and stakeholders, collected requirements, designed, implemented and deployed systems
- Maintained a set of small applications. Directly dealt with end users.
